

DRONADULA RAMANJANEYULU

Cybersecurity Analyst | AI-Assisted Software Developer

+91 93982 24651 | Guntur, Andhra Pradesh | ramanjaneyuludronadula4676@gmail.com | [LinkedIn](#) | [GitHub](#)

CAREER OBJECTIVE

Passionate Cybersecurity Analyst with hands-on expertise in offensive security (penetration testing, red teaming) and defensive techniques (IDS/IPS, firewalls), proficient with industry-standard tools including Metasploit, Nmap, Burp Suite, Wireshark, Aircrack-ng and John the Ripper, and a strong understanding of the OWASP Top 10 and social engineering tactics. Actively extending this foundation into AI-assisted automation and OSINT tooling to build practical, intelligent security software.

EDUCATION

Bapatla Engineering College, Bapatla

B.Tech, Computer Science & Engineering - Cyber Security

2023 - 2027 (Pursuing)

Krishnaveni Junior College, Sattenapalle

M.P.C - Mathematics, Physics, Chemistry

2021 - 2023

SKILLS

Security Tools: Metasploit, Burp Suite, Wireshark, Nmap, Aircrack-ng, Hydra, John the Ripper, Nessus, Acunetix

OS & Platforms: Kali Linux, Linux, Windows, Android

Security Concepts: Vulnerability Assessment, Penetration Testing, OSINT, OWASP Top 10, Steganography, Networking, Cryptography

Development & AI: Python, Git/GitHub, Prompt Engineering, AI API Integration (Gemini, Groq, Ollama), Automation

Soft Skills: Time Management, Team Collaboration, Reporting, Communication, Cybersecurity Awareness Speaking

WORK EXPERIENCE

Cybersecurity Intern - Synthquest Pvt Ltd, Guntur

May 2026 - Present

- Conducted vulnerability assessments using Nmap, Nikto, and OpenVAS across client environments.
- Performed web application penetration tests using Burp Suite and SQLMap, documenting findings and assisting with incident response reports.
- Built Python scripts to automate reconnaissance, including URL filtering and configurable crawling for authorized web assessments.

Ethical Hacking Workshop - Synthquest Pvt Ltd, Guntur

Oct 21-25, 2025

- Practiced web application security testing with Burp Suite and SQLMap, and network reconnaissance with Wireshark, Nmap, Photon and OSINT techniques.
- Gained applied exposure to password security, steganography, social engineering, and authorized phishing / DoS-DDoS testing methodologies.

PROJECTS

OSINT-X AI - AI-Powered Linux OSINT Investigation Framework [GitHub](#)

- Orchestrated Linux recon tools (Sherlock, theHarvester, Whois, Photon, Nmap) into a single modular CLI pipeline with normalized, AI-generated investigation reports.

AI Code Analyzer - Intelligent Malware & Vulnerability Detection [GitHub](#) | [Live Demo](#)

- Built a Streamlit + Google Gemini AI app that detects SQL injection, XSS, reverse shells and hardcoded credentials in source code, with a heuristic fallback engine and multi-format (TXT/PDF/DOCX) reporting.

Scriptoria - AI Film Pre-Production Platform [GitHub](#) | [Live Demo](#)

- Developed a Gemini-powered platform that turns a one-line story idea into a full pre-production package - story concept, characters, screenplay outline, and budget plan - with multilingual support.
